

# Rain Barrel Workshops

LIVE Green in conjunction with The Lancaster County Conservation District will be providing Lancaster homeowners with two workshops taking place at the Lancaster Environmental Center.

Watershed specialist Mathew W. Kofroth will present information that will include the nature and impact of urban stormwater pollution – He will also offer design solutions including rain gardens and bio-swales to compliment the installation of rain barrels.

### Environmental Benefits

Rain barrels offer multiple impacts and benefits to both the homeowner & municipalities' infrastructure. Using rain barrels will help:

- Divert water from the municipal storm drain system
- Provide oxygenated, un-chlorinated water which is ideal for plants
- Direct overflow water where it will have the most beneficial impact.

### An Urban Greening Initiative

#### LIVE Green Mission statement:

Building stronger and healthier communities through environmental projects.

Gray 60-gallon capacity; screw top; re-purposed and food grade barrel; cost \$50

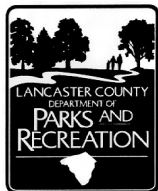

Locally sourced and outfitted Blue 55-gallon capacity; fixed top; re-purposed and food grade barrel; cost \$30

Dates: Sat March 6  
or Saturday March 27

Time: 9am – 11am

Where: Lancaster  
Environmental Center
